

## Measuring Bracelets and Cuffs

---

- Measure the circumference of the wrist above the wrist bone (towards the elbow) with a flexible tape measure.
- Compare the measurement to the chart and choose the bracelet size that corresponds to the measurement.
- Our sizes are designed to fit comfortably with the upper range of the wrist measurement. For example; a woman whose wrist is approximately 6", size S will fit well, but if a looser fit is preferred, size M is also suitable.

## Measuring Bangles

---

- Bangle size is determined by the size of your hand and *not* your wrist.
- To determine your bangle size, simply tuck your thumb into the palm of your hand (as if about to put on a bangle) and using a measuring tape, measure your hand all the way around the set of knuckles closest to your wrist, from knuckle to knuckle. Compare that measurement to the chart.
